Instructions for use

This test report may be used to classify the thermal transmittance U_w .

Validity

The data and results given relate solely to the described, tested object.

Testing the thermal transmittance does not allow any statement to be made on further characteristics of the present structure which could define performance and quality.

Thermal transmittance

$$U_w = 5,0 \text{ W}/(\text{m}^2 \cdot \text{K})$$

Notes on publication

The ift Notice "Notes on the use of ift Test Reports" applies.

The cover sheet can be used as a summary.
